DENTAL COLUMBIAN

DEDICATIONS

DR. STANLEY R. SADLES

We will always remember Dr. Stanley Sadles who, with a willing hand and a smile made our time in the clinic floor enjoyable as well as informative. As much as a part of our morning routine as a cup of coffee was his cheerful morning greeting: "What are you doing today?". And of course, no cavity prep was complete without the infamous "get your largest spoon excavator" and "deeper! you're still in enamel". And if inlay rock and roll had got you down, he'd help seat that sucker in two seconds! . But more than any remembered phrase, we leave Columbia feeling grateful to have had someone as caring and dedicated to teaching high standards as Dr. Sadles. We are thankful to have been instructed by this interested and talented professional. It is to the loss of future classes that Dr. Sadles plans to retire this summer. Or as he humorously refers to it, his "Graduation" to Arizona; but we are honored to have experienced his warmth and concern. Thank you Dr. Sadles.

DR. LOUIS MANDEL

With a loud "C'mon and do it already!!!' Dr. Louis Mandel kicked us into the field of oral surgery and the real world of dentistry which we entered for six weeks during our senior year armed with knowledge of mucoceles, pocket biopsies, and mushrooms.

Dr. Mandel the founder of the Salivary Gland Clinic at Columbia SDOS taught us common sense and practicality concerning not only surgical skills, but business skills as well, liberally sprinkled with dry wit. His true concern for the welfare of the students has made him an obvious choice for this dedication. So what's the bottom line? Thank you Dr. Mandel for being just the way you are!

DR. ROBERT GOTTSEGEN

Dr. Robert Gottsegen and Columbia Periodontics are synonymous. Anyone who completed postdoctoral periodontics or undergraduate dental school must have been influenced by him.

As Director of the Division of Periodontics from 1969 to 1988, Dr. Gottsegen has proven to be a versatile administrator. He runs a taut ship, bringing together an outstanding faculty and students of international repute.

He continues the Columbia tradition of preeminence in periodontics through research. As a teacher, he stimulates the best in his students through intellectual challenge. More importantly, as a dentist he exemplifies what is best in the profession through his integrity, intellectual grit, and dedication to the field.

Those of us who came to Columbia because of Robert Gottsegen hope that he will continue his affiliation with the school and give future students the opportunity to experience all that he has to offer. The flame that Dr. Robert Gottsegen was handed in 1969 has become a torch that cannot be extinguished.

Columbia University in the City of New York | New York, N.Y. 10032

SCHOOL OF DENTAL AND ORAL SURGERY Office of the Dean

630 West 168th Street

February 8. 1988

Dear Class of 1988:

Yearbooks become a means for classes of students to mark their passage through an educational process. The books receive immediate attention and, then, usually are put aside for rainy days years later. What then will come to your memory about the years spent at Columbia University, School of Dental and Oral Surgery? Will the difficult times of struggles to complete formal coursework and to comply with what you most likely considered bureaucratic rules and regulations prevail in your thoughts? Or, will the informal contacts with faculty, staff and classmates predominate in your thoughts as you browse through these pages in years hence? For most of you, we hope it will be the latter recollections which will become important to you in the future.

Columbia has provided you with a solid education in dentistry. In our opinion, and in the opinion of others, you have received one of the most thorough preparations for dentistry that is obtainable. But, we know that to use that education in a health care setting for the betterment of mankind and for your own personal satisfaction takes more than facts. It takes a caring attitude about people. While there is formal coursework in the curriculum on the behavioral sciences, most of us learn how to care about others through our interaction with each other on a one-to-one basis. It's the time a busy person devotes to your personal problem, the chance conversation, the kind effort of another person which you will remember best as encouraging you to move forward. Pass on those positive interactions in your dealings with your patients and colleagues and you will find that each day becomes one which will bring you personal and professional satisfaction.

Please know that our goal was to help you reach the first step in your career in dentistry. Continue to look to us for the advice and encouragement that you will need as you move forward in your professional life. As alumni you remain part of the school.

Best wishes in your future endeavors.

Sincerely yours,

Octan J. Jones ich Allan J. Formicola, D.D.S.

WHO'S LOOKING
OVER YOUR SHOULDER???

OPERATIVE DENTISTRY

One of the main reasons for the prestige of American Restorative Dentistry in the middle decades of the twentieth century was its pursuit of excellence using long lasting and proven materials such as amalgam and gold in the restoration of teeth. Operative Dentistry was taught with enthusiasm, conviction and an aim toward perfection. The principles and values of G.V. Black were held in high esteem and resulted in restorative dentistry that has come close to lasting a patient's lifetime.

What is happening to the image of restorative dentistry in the eighties is largely due to economic pressures and a public awareness that our standards are falling, and consequently the public's confidence in dentistry has been shaken. To correct this image, we will have to deliver high quality, long lasting restorative dentistry at

fair fees.

This is a great challenge for you since a great deal of poor dentistry today is being done in the name of cosmetics, and many teeth are being sacrificed at its alter. Endodontists have never been busier as wreckless turbines reduce enamel and dentin in seconds as if they were subjected to a pencil sharpener. Laboratories have a bonanza in the metal ceramic restoration to the detriment of the more conservative gold inlay and gold crown which demand more skill, patience, and self-discipline on the part of the operator.

Enamel is still our finest restorative material, and who has preserved it more than the Operative Dentist through conservative micropreparation of teeth using magnification and rubber dam.

Your challenge will be to earn the confidence and respect of patients, to render restorative dentistry services that will last a long time, and to serve our profession with dignity and high ethical standards.

All the teachers of Operative Dentistry welcome you to our great profession, and wish you success and happiness in dentistry.

Your colleagues and friends in the Division of Operative Dentistry acknowledge with deep appreciation your many wonderful years of dedicated service to the School of Dental and Oral Surgery.

We are grateful for all that you have done and look forward to your continued friendship.

With all our sincerest best wishes to both of you.

The Faculty and Staff of Operative Dentistry

PROSTHODONTICS

The role of the Class of 1988 for the next decade will be much more significant than the classes in the past. The Class of '88 will be facing a society that is more concerned and knowledgeable about health care in general, and what the expectations of the health care providers should be doing for them.

Your class will be confronted with clients asking for a second opinion. Dentistry is no longer a stepchild to medicine, it is an intricate part of it. Your class will be treating people who are living longer. From the very inception, the heart of the practicing dental profession has been restorative treatment. The advancements in prosthetic principles, concepts and practices as first described by Pierre Fauchard in the 18th Century were the beginning of modern dental prosthetics. Fauchard's ingenious prostheses along with other pioneers contributed immeasurably to the development of dentistry as a profession. Prosthodontics constitutes by far the largest and most difficult part of dentistry, and thus makes it a distinct branch of the art of medicine and gives to it the power to add to health, comfort, and enjoyment to life.

Many developments resolving from World War II led to significant advances in prosthetic dentistry. Among the most important innovations in the mid-20th Century years, are the high-speed rotary instrumentation for tooth preparation and metal alloys to which porcelain can be directly

bonded.

The treatment advances provided by these and other related developments precipitated the full mouth rehabilitation concept which is now widely accepted. Concurrent improvements in local anesthetic agents, forehanded chairside techniques, articulating devices, impression materials, cements and plastics for provisional restorations were realized. With a broader spectrum of treatment alternatives available, total patient care opportunities have been enhanced.

The biologic physiologic basis for complex clinical prosthetic procedures have been established and has guided the design and fabrication of all types of fixed, removable implants and maxillofacial protheses. The Class of '88 will be involved in the treatment of the medically compromised patient and also in the treatment of the geriatric individual.

The Class of '88 will see the development of sophisticated techniques, such as, the development of laser technology in which artificial replacements will be computer designed and programmed.

It is our hope that the 1988 Graduates of Columbia will play a significant role in bringing this about. The Faculty of the Division of Prosthodontics would like to congratulate you and extend their sincere best wishes to you in your chosen profession.

DENTAL AUXILIARY UTILIZATION AND PRACTICE MANAGEMENT

The DAU/Practice Management Faculty and Staff extend congratulations and best wishes to the Class of 1988. We also wish to thank the class for its cooperation in pioneering the Quality Assurance Practice Management Computer Program. Without your serious participation, this milestone in SDOS education could not have been achieved. We hope that the experience and knowledge gained in this program will add a vital new dimension to your professional life.

We are developing a third year computer program so that the third and fourth clinical years will present a continuum in automatic data information, processing, and utilization.

DAU's motto, "Don't reinvent the Wheel" will stand you in good stead throughout your professional life.

GOOD LUCK!!

David Kaplan, DDS

Dr. D. Kaplan

PEDIATRIC DENTISTRY

Congratulations from the staff of Pediatric Dentistry. It has been a challenging four years, but your hard efforts have now come to fruition. We, in Pediatric Dentistry, wish you the best and hope that you include the child in your practice, be it the general practice of dentistry or one of the specialties. We hope that you will continue to remain a "student" and a true professional. It is most difficult to remain current in all the areas of our profession during these times. Through our journals, continuing education, and personal dedication, you will be able to practice the level of oral health care you have strived to learn.

In the coming years, Pediatric Dentistry will continue to focus on prevention, growth and development guidance, and caring for the child with medical and physically compromising conditions. You have the ability and the judgment to provide basic care to these children. For your child patients you can be the introduction to a higher quality of life through a positive experience in dentistry. You have our best wishes for success and an exciting career in the profession.

PERIODONTICS

The changes in dentistry and dental education have been momentous in the last quarter century. Periodontics has been a central focus of this revolution. Supported by the dramatic reduction in dental caries and the increase in human longevity, the goal of a lifetime natural dentition has propelled periodontics to the forefront of dental science.

The central philosophy of the Division of Periodontics is the ability and willingness to interpret and respond to the research findings in basic science and clinical periodontology. The key to successfully imparting this philosophy is a unique faculty blend of researchers and clinicians. The contributions of the Columbia faculty are notable, and Columbia graduates include several dental school deans and the authors of a number of textbooks. This eclectic blend of faculty offers the Columbia Student a broad range of approaches to clinical problems. The graduate is well prepared to deal with the immediate needs of his or her patients and more importantly, is ready to continue to study and understand the changes in periodontics in practices that will enter the twenty-first century.

Drs. Susan D. Karabin, Robert Gottsegen

Dr. Robert Gottsegen is first of all a Columbian. He earned his D.D.S. Degree and Certificate in Periodontology at Columbia in 1943 and 1948 respectively. Since that time he has brought honor and respect to his Alma Mater through his achievements in his chosen profession and by his influence on generations of Columbia graduates.

If there is a triple crown in Periodontics, Dr. Gottsegen is among the few holders of this unique title. A past President of the American board of Periodontology, Director and Chairman of the American Board of Periodontology and the Director of the Division of Periodontics at SDOS from 1969 through 1988, Dr. Gottsegen has had a profound impact on dentistry in general and periodontics in particular. His commitment to his profession, his profound grasp of the periodontics literature, and his broadly based intellectual curiosity exemplify the best SDOS tradition. It has been in no small measure due to his leadership that Columbia has maintained a fine reputation in teaching and clinical investigation during the decades that periodontics assumed a central role in dental education.

Bob, your colleagues here at Columbia wish you well as you begin a new phase of your career. We will eagerly continue to call upon you for the wise counsel you so generously provide. With warmth, admiration and respect from the students and faculty of the Division of Periodontics, School of Dental and Oral Surgery at Columbia University.

ENDODONTICS

The goal of Endodontics is to eliminate the root as a source of infection. This can be done prophylactically by protecting the pulp during restorative procedures as well as actively during cleaning, shaping and filling of the root canal.

Endodontic treatment gives you a possibility to prevent and relieve pain. Endodontic treatment is rewarding, and done the right way - it is fun.

SPECIAL DENTAL SERVICES

The patient population is changing rapidly. The philosophy of our clinical rotation is to introduce students to a population of patients whose needs are dictated not only by their oral disease, but also by their medical needs.

As we look to the future, this patient population will grow. This increase is due in part to medical advances and an increasing age of the at risk population. This field will play a considerable role in the future of dentistry.

It is important to understand the necessity of evaluating the entire patient in formulating a treatment plan. We wish the Class of 1988 success in the future.

Congratulations to the Class of 1988!

You can be justifiably proud of yourselves in receiving a doctorate from Columbia University. As you should realize, academics at Columbia University are very demanding and you had to spend much time and effort to achieve academic success at this institution.

Now, at this point it is important to remember that you should not discard your academic habits. Although this professional plateau has been reached it is necessary, even mandatory, that you continually read and study the appropriate literature and textbooks, in order to forever keep yourselves "current". It is one of your responsibilities to encourage this of you. Your patients will demand this of you.

Sincerely, David J. Zegarelli, D.D.S.

Drs. J. Smith, R. Schiff

Dr. Thomas Gorman

The role of the dentist as a member of a multidisciplinary team involved with diagnosis and treatment of temporomandibular joint diseases is evolving. TMJ disorders are often at the interface of several medical and dental specialties. Students who have had an opportunity to see patients in the TMJ clinic will appreciate the wide range of TMJ-Facial Pain disorders which exist. The thorough dental-medical background the students receive provides a good skeleton upon which clinical knowledge can grow. The capacity to see the whole person and not just the TM joint is emphasized as evidenced by staff members from psychiatry, physical therapy, oral surgery, and general dentistry. It will be the role of the General Dentist to recognize TMJ problems and start the diagnostic process.

COMMUNITY HEALTH/GERIATRICS

The elderly represent the most rapidly growing segment of the U.S. population. Individuals 65 years and older now comprise approximately 12 percent of the U.S. population and are expected to increase by 20 percent by the year 2000.

These statistics illustrate the need for dentists to gain the knowledge and skills necessary in providing care for this growing segment of the population. The elderly is far from a homogeneous group. Well and frail, ambulatory and compromised, homebound and institutionalized have all been used to describe this diverse population.

The Geriatric Dentistry Program at Columbia University Dental and Oral Surgery provides both didactic and clinical courses to prepare students to meet the dental demands of the elderly. Physiologic, psychologic, and psychosocial issues of the elderly are covered in the academic program as well as conventional and innovative approaches in the dental treatment of the elderly.

It is hoped that through the courses offered in the Geriatric Dentistry Program, students gain an increased awareness of their role in the health care of the elderly individual and continue to increase their knowledge and skills in the delivery of dental services to the older adult patient.

CENTER FOR CLINICAL RESEARCH/PREVENTIVE DENTISTRY

The establishment of a Center for Clinical Research in Dentistry at Columbia University is a response to major changes that have been taking place in the patterns of dental disease and the nature of dental care, in the growing interest of the public in prevention of disease and maintenance of health, and to the opportunities these changes provide for contributing to the future of dentistry.

All students should be familiar with the research process and should develop a critical sense and an ability to evaluate the supporting data for new materials and techniques. The Clinical Research Center can help provide the appropriate attitude and skills.

THOM GUNN: HUMAN CONDITION

Now it is fog, I walk Contained within my coat; No castle more cut off By reason of its moat: Only the sentry's cough, The mercenaries' talk.

The street lamps, visible, Drop no light on the ground, But press beams painfully In a yard of fog around. I am condemned to be an individual.

In the established border There balances a mere Pinpoint of consciousness I stay, or start from, here: No fog makes more or less The neighboring disorder.

Particular, I must Find out the limitation Of mind and universe, To pick thought and sensation And turn to my own use Disordered hate or lust.

I see, to break, my span.
I am my one touchstone.
This is a test more hard
Than any ever known.
And thus I keep my guard
On that which makes me man.

Much is unknowable. No problem shall be faced Until the problem is; I, born to fog, to waste, Walk through hypothesis, An individual.

ROBERT ADAMI, D.D.S.

Rob, as he is known to his friends, plans to be a general practice resident upon graduation. He is a reliable and conscientious person who will be fondly remembered by his fellow classmates. Rob's favorite quotation is "Never say Never" and his interests outside of dentistry revolve around weight training and a love for all types of music. Before dental school, Rob attended Brooklyn College.

JOSEPH A. ALLEN, D.D.S.

RICHARD ALTMAN, D.D.S.

PAUL ANDERSON, D.D.S.

November 1, 1987 was an important date in Paul's life- it was his wedding day. His plans, after dental school, are according to him; "let's wait and see". Paul's favorite quotation is by P. Rawden; "For Everything You See ... You Wonder; For Everything You Do ... You Learn." Rowing, playing the bass, and skiing are among Paul's interests and hobbies. Paul graduated from Clark University in 1981 with a degree in Biology.

ROBERT J. BADRIGIAN, D.D.S.

Rob is known as the "B" in the team of "B" and "S". His plans after dental school include being a part of a GP residency and marrying Terry. We will remember Rob for his "outstanding good looks and charm". Outside the realm of dentistry, Rob is interested in modelling, eating and criticizing. Before dental school, Rob attended Boston University where he graduated in 1984 with a degree in Biology. Rob wished to express the following; "I would like to thank all the little people at Columbia that made this degree possible."

JOHN E. BAKER, D.D.S.

John came to Columbia SDOS from St. Joseph's College armed with a B.S. in Biology, a pleasant, easygoing personality and a fishing pole. After graduation, John plans to practice out on the Island not too far from the Sound and possibly specialize in Orthodontics. This will enable John to continue to pursue his hobbies of fishing, boating and collecting tropical fish.

MARIA THERESA BENEDICTO, D.D.S.

MICHAEL KURT BERKY, D.D.S.

Kurt, as he is known to his friends, is going directly into private practice in Connecticut upon graduation from Columbia. He hopes to specialize in Prosthodontics in the not too distant future, and to share his knowledge through teaching. In his spare time, Kurt can be found playing squash or tennis, rowing or roaming the country-side with his camera. Kurt attended Trinity College in Hartford where he majored in Economics.

JOSEPH CHEN, B.D.S., D.D.S.

Joe joined the class of 1988 as an advanced standing student, already equipped with a British dental degree. In the future, Joe plans to limit his practice to Periodontics. While his fine tuned sense of humor keeps his colleagues amused, he scales not only teeth but plays scales on his violin. In addition, Joe is an avid stamp collector. Joe's college alma mater is Brooklyn College.

DAVID CHENG, D.D.S.

RALPH T. COSTAGLIOLA, D.D.S.

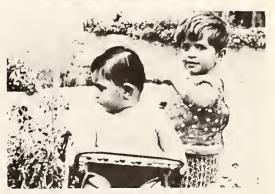

NADER DAYANI, D.D.S.

After Nader graduates from Columbia SDOS, he intends to go directly into a General Practice Residency and then into private practice. We will always remember Nader as the "ghost" of freshman year. Before dental school, Nader attended SUNY Stony Brook and New York University.

SHARON CRAWFORD DE CHIARA, D.D.S.

PETER J. DE LISI, D.D.S.

MARIANNE DICERBO, D.D.S.

With a laughing smile on her face, Marianne could always be counted on to decipher any didactic dilemma. She has already accepted a General Practice Residency Program in the Schenectady area and then will go into private practice. A country girl at heart, Marianne enjoys long walks in nature and reading. Marianne graduated from St. Lawrence University in 1984 with a B.S. in Chemistry.

JAMES DOLIN, D.D.S.

Jim came to Columbia SDOS from Temple University as an advanced standing student in the summer of our sophomore year. When he gets the opportunity, he enjoys travelling with his wife, Marnie. While at Columbia, he pursued research opportunities with Irwin Mandel and Syngcuk Kim. After graduation, Jim plans to enter a residency program and after, to continue his studies in Oral Surgery. Jim's college alma mater was Emory University in Atlanta, Georgia.

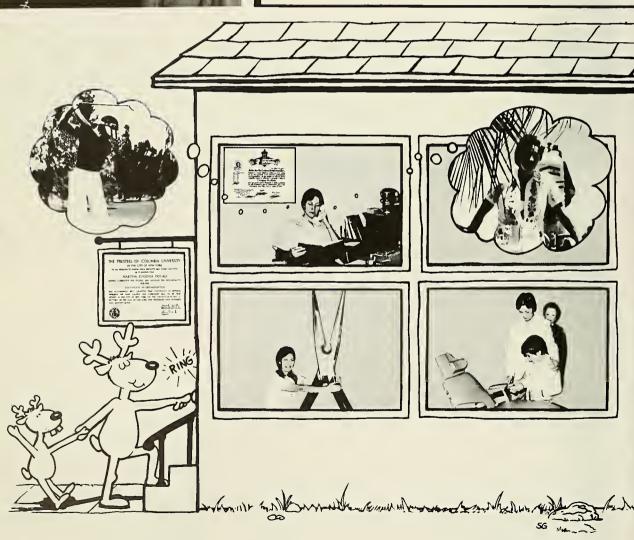

MARTHA E. DOVALI, C.D., D.D.S.

Martha, the yearbook's invaluable business editor, joined our class as an advanced standing student in the summer of 1986. She has a degree in Dental Surgery (C.D.) from the University of Guadalajara, Mexico and a Certificate in Orthodontics from Columbia University. While at Columbia, she has been involved in research, Student Council and Alpha Omega Fraternity. After graduation, she plans to join her family in California and establish a practice limited to Orthodontics.

STELLA EFTHYMIOU, D.D.S.

After graduation, Stella plans to do a General Practice Residency, then stay in private practice for a few years before considering a specialization in Endodontics. Incidentally, Stella is presently in the Endodontic Elective. Besides her overwhelming interest in extirpating pulp tissue, Stella enjoys crocheting and sewing. Before coming to Columbia SDOS, Stella attended Rutgers University where she graduated in 1984 with a major in Biology.

MURRAY Z. FRIEDMAN, D.D.S.

The highlight of sophomore year for Murray was the birth of his first child, a son-Steve Allen, and at the present time, another child is due in March. Murray relaxes by browsing through Hot Rod, Car Craft, Road and Track and for variation, the Journal of Prosthetic Dentistry. Murray's favorite quote is "Look, Listen and Learn." Forever an athlete, Murray remains active in baseball and football leagues as well as running a car leasing business throughout the scholastic year. Murray's future plans are to enter a General Practice Residency, followed by private practice.

SILVIA M. GONZALEZ, D.D.S.

Silvia, also known as "Shorty", wants to be remembered for her smile as well as one half of Mutt and Jeff. Her love and talent for working with children will lead to a career for Silvia devoted to pediatric dentistry. Silvia's favorite daydream finds her laying on a white, sandy beach somewhere in the Caribbean doing nothing at all. Her hobbies are dancing, cooking, needlepoint and travel, with an additional interest and penchant for Agatha Christie novels. She graduated from NYU in 1984 with a B.A. in Biology.

JEANNETE GRAUER-SAPORTA, C.D., D.D.S.

The most outgoing of the advanced standing group, has a degree in Dental Surgery (C.D.) from the University of Montevideo, Uruguay. She is married to Dr. Diego Saporta and has two children, Gabriel 8, and Ricky 6. Upon graduation Jeannette plans to practice General Dentistry for a while and then pursue a specialization in Orthodontics.

BARRY M. GREENFIELD, D.D.S.

Barry, our audio-visual technician- Alfonso, started off dental school by getting married. In his spare time, Barry is a sports enthusiast and enjoys both skiing and swimming. After graduation from Columbia SDOS, Barry intends to enter a GPR Program, afterwhich he will work in a general family dental practice. Barry attended Baruch College where he received a B.A. in Biology in 1984.

GREGORY A. HACK, D.D.S.

A.B. HAMMOND III, D.D.S.

PAUL IAROPOLI, D.D.S.

Our resident "Honeymooners" expert, par excellence, Paul could always come up with an appropriate Ralph Kramden quote of the day. His favorite quotation is by none other than Ralph Kramden; "Be kind to the people you meet on the way up, because you're going to meet them on the way down." An avid sports fan, Pablito (as his patients call him) dreams of replacing Vin Scully as sportscaster on NBC's baseball game of the week. However, until that time, Paul will become a General Practice Resident upon graduation from Columbia SDOS. Paul attended Columbia College before dental school and has a B.A. in Psychology.

INSUP LEE, D.D.S.

Insup, better known as Matthew or "Chiefy" would like people to remember that although he complained, he always did what was necessary to complete the task. Matthew is a neophyte wine critic, a devoted Trekkie and relishes Volleyball and Football competition. His favorite quote remains "Live Long and Prosper." Matt entered Columbia SDOS with a degree in Chemistry from Boston University, and no, he did not know Badrigian then! In addition, Matt would like to include the following: "It was fun and a pleasure to have had the opportunity to get to know you. Perhaps in the years ahead we can sit and share a glass or two."

MARK LEFKOVITZ, D.D.S.

JINA LEE LINTON, D.D.S.

Jina, the most quiet of the advanced standing students came to Columbia with a Dental Degree from the Yonsei University in South Korea. When she gets the opportunity she enjoys reading good books and traveling. She is married, and her plans after graduation are to enter a postgraduate program and then pursue a career in teaching.

LYNN S. LO, D.D.S.

Lynn is a genuinely nice person who always displayed a gentle touch when working in the dental clinic. Lynn is currently engaged and in her spare time, she can be found camping, playing tennis, or reading. She intends to go into a general practice residency program upon graduating from Columbia SDOS. Lynn has a B.S. in Biochemistry from the University of Rochester.

TERENCE MAHASE, D.D.S.

Terence is more at ease being addressed as Terry or Teriyaki which then enables him to enjoy life's simple pleasures. Outside of dental school, Terry enjoys running, tinkering with his car and going to parties! Terry's favorite quote is "a bird in the hand is worth two in the bush." He plans to enter a GP residency and afterwards plans to open his own office. Terry graduated in 1982 from Hunter College with a B.S. in Medical Technology.

MARIE MCKENZIE, D.D.S.

Marie can always be counted on to greet you with a cheery what's up! Marie is an avid aerobicist, as well as enjoying cycling and all types of music. Her favorite quote is by Sidney J. Harris; "The time to relax is when you don't have time for it." Marie plans to enter a General Practice Residency Program with a long range goal of private practice. Marie graduated from Cornell University in 1984.

WAYNE MICHAELS, D.D.S.

When asked if he had any nicknames, Wayne responded that he had none that were fit to print. Wayne tries to play golf as often as possible and relaxes at the nearest available beach. When asked what his plans after dental school are, Wayne said that he would like to start his own practice, of course! Wayne majored in Biochemistry at SUNY Stony Brook and SUNY Buffalo.

PATRICIA MOESINIA-YOUDEEM, D.D.S.

Patricia's first year at Columbia SDOS as an advanced standing student will bring back memories of her first pregnancy, followed by the birth of her daughter. Outside the clinic, Patricia's time is spent painting and taking care of her little girl. Her future plans revolve around her desire to continue with postgraduate training. Patricia graduated from the University of Paris in 1983.

BARRY MULLIGAN, D.D.S.

Barry is the class of 1988's perennial sun worshipper. Hence, his future plans are to relocate to either California or Florida where he could pursue his hobbies of bodysurfing, sunbathing and weight lifting. His favorite quotation is "Living on the Edge." Barry came to Columbia SDOS from Manhattan College, after graduating in 1984 with a degree in Biology.

GARFIELD W.B. NEITA, D.D.S.

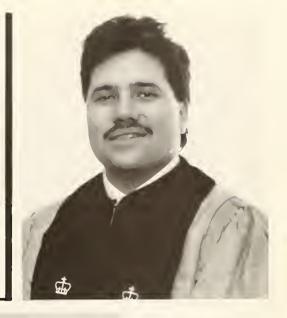

The sharpest dresser at Columbia SDOS, Garfield, aka Wayne, always remains calm under pressure. Balancing his time between Jamaica, Atlanta and NYC can be difficult, but his new wife offers appropriate motivation. In his free time, Wayne displays some chilling piano playing. Wayne entered Columbia SDOS with a B.S. in Chemistry from the University of the West Indies and Long Island University.

FRANK JEFFREY PALMACCIO, D.D.S.

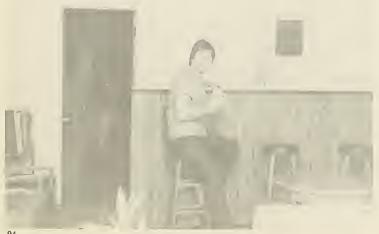

MICHAEL J. PAVELCHEK, D.D.S.

When asked what he would like remembered about himself, Mike replied "everything," Mike's extracurricular activities include skiing, spectator sports, golf, target shooting, sailing and photography (thanks for the candid yearbook shots, Mike). His favorite quote comes from Pink Floyd; "And you run, and you run, to catch up to the sun but it's sinking. Racing around to come up behind you again. The sun is the same in a relative way, but you're older." Mike graduated from Muhlenberg College in 1984 where he obtained a B.S. in Biology.

LISSET PENTON, D.D.S.

Lisset was always available with a winning smile and to lend her aid when Spanish translation was necessary. Lisset's activities outside of dentistry include snorkling, diving and reading. In the future, Lisset will be a General Practice Resident, and eventually she hopes to go into private practice. Lisset graduated from Rutgers University with a B.S. in Zoology.

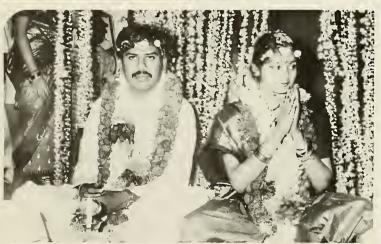

PARVATHI POKALA, B.D.S., D.D.S.

JUDITH RAPIEJKO, D.D.S.

MARYAM SAFAI, D.D.S.

Since the birth of her daughter in December of our Junior year, Maryam has been known fondly as "Mom." Her hobbies are painting, piano playing and travelling. Maryam intends to enter a General Practice Residency Program, followed by private practice. Maryam graduated from SUNY Buffalo with a B.S. in Biology in 1983.

RONALD SALYK, D.D.S.

Ron keeps us going with a witty running comentary about the perils of life as a dental student. He is married with two beautiful children; Colette, 6, and Lucien, 10. Outside of clinic hours, Ron enjoys hiking and cycling. After a General Practice Residency Program, Ron says he will work toward retirement. He came to Columbia SDOS with a B.I.D. from C.C.N.Y.

EDWARD SANOSSIAN, D.D.S.

Eddie is an all around nice guy, always willing to lend a helping hand or an instrument to a fellow classmate in need. Proud of his Armenian heritage, Eddie also spends time cooking, horseback riding, camping, taking aerobics classes and photography. After a General Practice Residency, he plans to live in suburban Conneticut and work in a private practice with an emphasis in prosthodontics. Eddie attended Fordham University where he obtained a B.S. in Biology.

FRANK PASQUALE SCARTOZZI, D.D.S.

Frank is also known as Scarozzi and sometimes the "Gnat", and he will always be remembered as seeing the most patients in a day. When he is not utilizing his dental expertise, Frank can be found running the Psi Omega Fraternity singlehandedly. If that is not enough to keep his spare time at a minimum, Frank has been the class treasurer for the past three years and quite active in Student Council and helping to solicit funds for the yearbook. In the spare time that he does actually have, Frank can be found at Rare Coin Exhibitions. Frank graduated from St. John's University in 1984 with a B.S. in biology.

JOHN SCHAF, D.D.S.

"Behind every great fortune there's a great crime."

"I didn't come from a wealthy family, but my kids will."

LEO SETO, D.D.S.

Leo is fondly known as "Gadgets" by his fraternity brothers of Psi Omega. Leo will always be remembered as a sharp dresser, excluding his unique fish tie. During summer session of 1987, Leo got engaged to Diana and they plan to wed next August. Leo would like to add the following; "After being traumatized for four years, I am glad to graduate, yet I will miss my classmates who helped make these years unforgettable. See you at the Reunion."

LINDA SIEGEL, D.D.S.

PAULA-NAOMI SMALL, D.D.S.

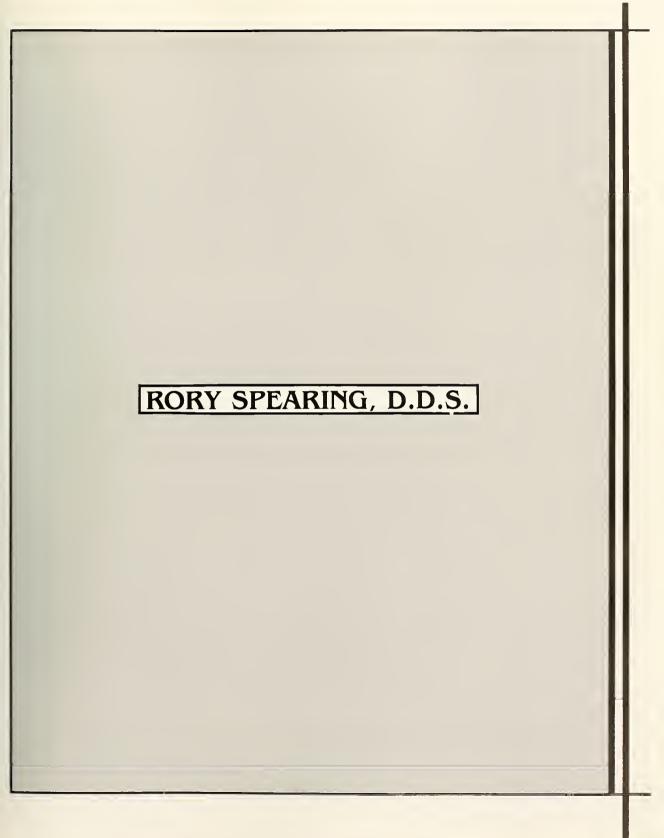

SCOTT SOLOMONS, D.D.S.

SHARON JUDITH STERN, D.D.S.

Sharon's calm and collected demeanor hides an individual liable to break into song with the slightest provocation. Besides theatre, her eclectic interests range from travel and wine tasting, to skiing and horseback riding. Upon exiting Columbia, she'll go into a General Practice Residency and eventually a small group practice. Sharon graduated from S.U.N.Y. at Stony Brook with a B.A. in Psychology and a zest for living.

MAYRA SUERO-WADE, D.D.S., M.P.H.

Mayra is involved in many student organizations among which are the Student National Dental Association, Committee of Black and Latin Student Organization as well as being involved in active research in the dental treatment of Head and Neck cancer patients. Mayra's short term plan upon graduation is to be a general practice resident and her long range goal is to work in corporate dentistry. Before Columbia SDOS, Mayra attended NYU where she graduated in 1984 with a degree in Romance Language.

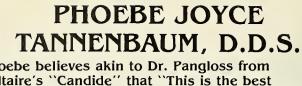

To God, who supplies me with continuous hope and inspiration; To past generations, who struggled to open doors that were once closed; To Mark J. Wade, M.D., my husband, my friend, my pillar of strength; To my dear family and friends who cared enough to always be there; To all those professors and teachers who shared their knowledge and helped me mold my career; To all of you, I dedicate my degree with love and admiration.

Phoebe believes akin to Dr. Pangloss from Voltaire's "Candide" that "This is the best of all possible worlds." Some of her nicknames are Pheebs and Freebie. After Columbia SDOS, she plans to enter a general practice residency program, afterwhich a pediatric residency or fellowship, followed by her long range goal of specializing in the treatment of pediatric oncology patients. Her interests outside the realm of dentistry include reading, painting, drawing, piano playing and prefers Jazz or Classical music for relaxation. Her college education was based in Providence at Brown University where she received a B.A. in Art.

MARK WEITZ, D.D.S.

Mark, also known as Moti, in his calm and efficient manner could be counted on for his sensible advice, even at Columbia's most hectic. Mark spends most of his spare time with cars, computes, and cameras (note his expertise with the senior portrait photos). Mark's senior year was made more eventful by his recent engagement and proposing dressed as a clown. From Columbia, he plans to enter a General Practice Residency. Mark attended Yeshiva University where he received a B.A. in Biology/Public Health Sciences in 1984.

To my dearest parents: THANK YOU. Quite a small token of gratitude for a lifetime of love and devotion. And to DASI. . . For waiting it out

ADVANCED STANDING STUDENTS

We were the latecomers. One morning during the summer of 1986 we marched into the 8th. floor lab for an endo lecture. 45 pairs of eyes turned our way perhaps wondering what these ten strangers were doing there.

We came from distant corners of the world: Korea, Uruguay, France, China, The Netherlands, Mexico, England, Philippines, Haiti and Connecticut. Most of us with a Dental Degree from their native land, some of us with specialties from U.S. schools, but all of us eager to absorb the famous "Columbia Techniques".

We have not been disappointed. We consider ourselves fortunate to have been placed with a group of individuals who welcomed us into their class and offered friendship and a warm smile or a pat on the back when it was needed. Now we are part of the class and share their opinion: "We may not be the smartest class but we are the nicest".

We are grateful for all the experiences we have had while at Columbia SDOS and feel honored to graduate with such a great Class as OURS.

October 12.1987

TO:

ALL STUDENTS

SUBJECT:

SIGN UP NOW FOR ADDITIONAL TRAINING

FROM:

DEAN FOR GREEN ENVELOPES

It is now, and always has been, our policy to assure that our students are well trained. Through our SPECIAL HIGH INTENSITY TRAINING PROGRAM (S.H.I.T.), we have given our students more Special High Intensity Training (S.H.I.T.) than any other school in the country.

If any student feels that he or she does not receive enough Special High Intensity Training (S.H.I.T.) now, or that he or she could advance more quickly by taking more Special High Intensity Training (S.H.I.T.) please see us immediately.

Our faculty and administrative personnel are specially trained to insure that you can get all the Special High Intensity Training (S.H.I.T) you can handle, on an individual or in a group basis.

Any individual who feels he or she has not received sufficient Special High Intensity Training (S.H.I.T.) should tell us immediately so we can place you at the top or our (S.H.I.T.) list.

NOTE: These are separate from all other requirements

PRODUCTION control procedures followed.

INFECTION control procedures followed.

Dr. Schwartz-enegger

IN MY OFFICE, .

... there'll be no quizzes.

... it'll be faster to retrieve a chart.

the lab will be less crowded.

... I'll have somebody for taking pans and scraping my crucibles.

... my assistant'll do the prep.

... I'll give my patients plenty of ..., to create work.

... there'll be time to daydream.

... I'll never ...

... there'll be nobody to fall back on.

... there'll be no proper attire requirement.

C.U. S.D.O.S. Final Self-Assessment Exam.

This test was prepared to evaluate the benefits of the Special High Intensity Training.

According to national statistics in the past, Columbia students scored on average the highest.

We, the Special High Intensity Training staff, expect that this year, our students will do well again.

Answer as follows:

- A. If the first statement is true and the second is false.
- B. If the first half of the statement is false and the second half does not make sense in addition to true third and fourth half of the statement.
- C. If the first statement is true nor false, but exactly opposite to the second.
- D. If you think this silly format should be deleted from the exam.
- 1. A pedo patient becomes uncooperative during a procedure; you should:
 - a. change to the 6 o'clock position.
 - b. tell the patient that you're going to call over that terrifying instructor.
 - c. tell the patient "No habla Espanol".
 - d. "threat, scold, doom".
- 2. When a pedo instructor talks about a "series of smooth curves and arcs", most likely he talks about:
 - a. his ski trip in Switzerland.
 - b. how he survived dental school.
 - c. features of Brooke Shields.
 - d. your instructor is probably delirious due to mercury vapor or N20.
- 3. How do some departments grade the students? by:
 - a. throwing dice(s).
 - b. flipping coin(s).
 - c. the "Random Walk Theory"; i.e. they take a monkey and let it throw darts to a
 - d. reading tea leaves.
 - e. all of the above.
- 4. What is the correct procedure to initiate endodontic therapy?
 - a. Gold foil

b. Omitting temp. after a crown prep.

c. Acid etch

- d. Cure the acrylic temp. in situ.
- e. Zinc phosphate base
- e. Copper tube impression.
- 5. What can you do with 3×5 inch Impregum?
 - a. Take an impression of the oral cavity and the oropharynx.
 - b. Take an impression up to the epiglottis area.
 - c. Take an impression up to the first 4.5 cm of the oesophagus.
 - d. Take an impression of the oral cavity and the middle cranial fossa.
- 6. What is the contraindication of local anesthetic?
 - a. On Monday mornings up to the summer of 1987 and on Fridays.
 - b. When the patient's knuckles do not turn white during the procedure.
 - c. When you do not see any drop of tears.
 - d. When the patient does not jump up after a vital pulp exposure.
 - e. When you suspect the patient can stand the pain.
- 7. What is the proper way to say to a patient in agony, during an oral surgery procedure?
 - a. You're singing my song.
- b. Hey, I suffer too you know.
- c. Off course it's gonna hurt. d. Another satisfied customer.

- 8. What can you do to increase your oral surgery production?
 - a. Empty the local anesthetic carpule in no more than 2 seconds.
 - b. You omit placing sutures, which tends to decrease your overhead.
 - c. If during an orthognatic surgery, the upper dentition does not fit the lower one do occlusal adjustment with a large acrylic bur on a straight handpiece.
 - d. Start luxating the tooth while asking the patient: "Are you numb yet?"
 - e. Let your legs and feet participate during the extraction procedure (foot rest).
- 9. An eighty year old white male came to the clinic with complete dentures which were "loose", had short flanges and probably difficult to correct. The patient complained also about a flabby, soft swelling that frequently was caught under the dentures. On intraoral exam, you found epulis fissuratum. Your approach would be:
 - a. Refer to a geriatric specialist, because he/she is more competent than a prosthodontist.
 - b. Refer to a geriatric specialist because he/she is more clinically experienced than he/she is familiar with the literature.
 - c. Refer to a geriatric specialist, because he/she has a more convincing attitude.
 - d. Construct a new denture, do not excise the epulis, because according to a geriatric specialist, it will go away spontaneously.
- 10. If your computer print out is not submitted on time, expect somebody will yell at you: a. Schmuck, b. Wise guy, c. Sucker, d. SOB, e. Schmiel,
- 11.A 35 year old male patient, that you have been treating for over 1 year, completely asymptomatic, presented with a P.A.x-ray of the upper left central incisor (#9). There was a P.A.R. and apparently deep mesial and distal radiolucent restorations. Upon thermal, mechanical and electrical testing, the involved tooth was nonresponsive, contrary to the adjacent teeth. Your approach would be:

 - a. take a history.
 b. subject the patient to history taking.
 c. complete the history.
 d. fill out the history questionaire.

- 12.An 18 year old female has a white lesion on her cheek, opposing to her right upper first bicuspid (#5), which was sensitive, had a red border and can be peeled off.
 - a. take a financial history and history of previous opposite gender utilization.
 - b. explain to the patient that a similar lesion may occur somewhere else and that you like to examine it.
 - c. take a wallet biopsy.
- d. date her.
- 13. If a prostho instructor prep. the bevel 3mm below the gingival crest, in a case with normal periodontium and upon try in, the metal coping did not fit immediately. The prostho instructor additionally told you that due to "reattachment" of the gingiva, the metal coping could not go down completely; what would you do if your instructor started cutting off the bevel of the metal coping to make it "fit"? a. Refrain from criticism, because you may get a bad grade.
 - b.Refrain from criticism, because the instructor may tell you that you are incompe-
 - c.Refrain from criticism, because the instructor may read you your rights as a dental student.
 - d. Close your eyes, ears and mouth.
- 14. Match the 2 columns: 1. If you don't listen to me, I will call over a. Mrs. Morett Dr. Kaplan to punish you.
 - 2.Do you know any dancing?

b.Walter

3. You have to squeeze it here.

c.Steven

4.Only two inches of impregum.

d.Nina e.Gus

5. Your patient has been waiting for 3 hours

Aan mijn moeder en wijlen vader, deze aan u opgedragen bladzijde kan de moeite, die u moe(s)ten getroosten, om uw kinderen groot te brengen, niet beschrijven. Maar daarom is mijn erkentelijkheid ervoor niet minder.

Aan Kee You, in de korte tijd dat we elkaar kennen, hebben we erg veel meegemaakt. Met liefde bied ik je het resultaat van de ontberingen aan.

uw zoon, jouw echtgenoot

yohan

To: MAYRA SUERO-WADE, D.D.S., M.P.H.

appreciate the courage, commitment and confidence embodied in this lovely lady. The hard work and personal sacrifice endured by Mayra to maintain a stable family life while not just surviving, but excelling in one of the nation's most rigorous dental school programs has kept me and everyone around her in awe and indebted. It does not take a lot of imagination to understand that life's journey towards professionalism for a minority woman, is no "cake walk", but Mayra ran this race filled with purpose and determination. She made no excuses for her position in the race, let nothing deter her from her goal, and now crosses the finish line a champion in whom God is well pleased. Mayra is special, so very special, and the past four years at Columbia has just been a "preview of coming attractions" to those of us who love her as she prepares to live out God's plan for the rest of her life.

Today, I'm not completely sure of all that the future will hold for Mayra, but I am sure that with God's help, it will be full of love and happiness, and I'm just glad I've been blessed with Mayra as a part of my life. I love you Mayra!

Your loving husband,

MARK J. WADE, M.D.

What's the perfect location for you?

"Healthco helped me make a better decision."

"Not being a follower, I wanted to practice a thousand miles from where I went to dental school. Healthco's sales rep contacted me, and I gave them my guidelines. They did their homework and found a perfect location for a general practice.

"Healthco painted a complete, balanced picture for me, comparing my various options and showing a sincere interest in placing me

in an area where I would be welcome and where I could grow.'

You can be one of the many successful new practitioners who are being helped by Healthco. Once we help you locate, we work with you in planning and designing your office, selecting your equipment and financing it at simple fixed interest rates, and showing you how to buy your supplies economically.

A-DEC PRESENTS 30 BREAKTHROUGHS IN EXCELLENCE."

A-dec brings you excellence with 30 dramatic developments specifically engineered to improve reliability and ease of use.

Now, these features and functions are brought together in our chair-mounted, cart and wallmounted delivery systems. Here are just a few examples of our new levels of Excellence:

We've set a new standard for handpiece holders! Without tools, you can adjust the angle of the holders. Plus their shape is a major step forward in asepsis.

Our new lever syringe requires 75 percent less operating force—for less hand fatigue—and allows precise flow control.

3. A new arm-mounted tray holder moves wherever you need it.

itself rotates 360 degrees,

The tray

for maximum flexibility.

4-30. There are many more innovations in the Excellence line. However, space is limited here. For the full

story, just ask for your complimentary Excellence brochure.

Simply return the response card in this magazine or see your full-service, authorized A-dec dealer.

You'll soon discover the many ways we're offering more than A-dec value

more than A-dec value and quality ... we're delivering absolute Excellence!

Good Luck!

To the Graduates

``1988''

We're doing more for your practice.

With quality home core products for your patients

Because home care is so fundamental to the total dental program you prescribe to your patients, Block's home care products are designed to facilitate the oral hygiene habits that maintain the results of your office treatment.

With quality professional products for your office

The excellence you demand in your operatory is a standard with every item in the growing Block inventory of superior professional products designed to make your chair time more effective.

With patient education programs

Block believes that an educated patient is an integral part of effective dental care. That is why we have an ongoing program of informative literature on important aspects of oral health directed at helping patients maintain the results of your office treatment.

With cose presentation oids for you and your hygienist

Among the printed materials we produce for your practice are post ers, displays and pamphlets that can be valuable aids in your diagnostic routines. Designed in a highly visible format, they can contribute to the efficiency of your busy schedule.

With ongoing research

Block's contributions to the progress of dentistry are being achieved in our extensive research facilities, where we are working to bring you new, high quality products for better oral care.

Continuing o trodition of service to dentistry

Dental Products Division Bleck Drug Corporation Jersey City, New Jersey 07302 Quality Products for Dental Health

Dependable Products. It's a simple cancept, but ane that has guided our family business since its inception in 1913. Three generations later we still have an excellent reputation among dental practitioners, because PREMIER PRODUCTS do what they say they do. They are dependable.

And mare importantly, the PAEMIER Company is dependable. You can rest assured that we will be here after you buy a PAEMIER product to guide you with helpful techniques and timesaving procedures. And, af course, every PAEMIER product cames with our satisfaction guaranteed stamp of appraval.

You have enough to warry about in your practice aside from whether a product will work once you place It in the mouth. So rest assured and use PREMIER PRODUCTS.

Send for your FREE PREMIER/ESPE-Premier catalog and ask about the BONUS for new dentists.

YEARBOOK COMMITTEE

The yearbook was put together over a period of seven months. Its completion, despite interviews, externships, and requirements attests to the work, imagination and dedication involved.

Sharon Stern, Phoebe Tannenbaum, Martha Dovali and Johan Thé, were the backbone of the team. They worked hard late nights and weekends to make its publication possible.

EDITORS Sharon Stern Phoebe Tannenbaum BUSINESS MANANGER Martha E. Dovali ART EDITOR Johan Thé **PHOTOGRAPHY** Senior Portraits: Mark Weitz Barry Greenfield G.W. Bridge: Martha Dovali Candids: Mike Pavelcheck Leo Seto Stacy Martha Dovali Alfred Ho Phoebe Tannenbaum Sharon Stern ART RENDITIONS: Johan Thé Phoebe Tannenbaum

Accu-Grafix, L.A., CA. Sharon found her forte in copy work. She spent many long hours Sharon DeChiara at the word processor in the library, Eli Marzo writing the dedications and the ad-Mercedes Dovali vertisements. Then she continued

to work in the layouts and the photographs. She was active in every aspect of the production. Creating ideas for pages, trying to lure other students to help. She gave unstintingly of her time and energy, all the time with a smile!

The 1988 Dental COLUMBIAN Staff hopes that the photographs and memories collected in this book will help our fellow classmates recall their years spent at COLUMBIA. We extend here our heartfelt congratulations!

Phoebe occupied herself with the task of pulling the Graduates pages together. Between laying out the photos and reviewing the biographies, she got us through our first deadlines. During the summer she began to create the artwork seen on the divider pages. This while we were all taking our first fledgling steps into the world of publishing.

STAFF

ADVISORS:

Dr. Sandford Salz

Dr. Steven Lepowsky

Martha did a phenomenal job in organizing a computerized system to solicit contributions. Innumerable phone calls and 600 letters to potential contributors were rewarded with a record collection close to 12,000.00 dollars. She was the main force behind the monumental task of folding, stuffing, addressing, stamping and sealing each request. But her efforts in no way stopped there. She spent many hours working on the layouts, taking pictures in the clinic, and to the G.W. bridge for the end sheets. It was hard to meet the deadline for publication and for requirements, but she did it.

Johan Thé, cartoonist, made the time pass quickly during those late night sessions. None could be more fun to work with, nor could his talent with pen and paper be surpassed. While we were all laughing at one cartoon, he was already imagining the next. And his wit for captioning the candids was matchless.

Special acknowledgement is deserved by many of the students, faculty and staff. We had encouragement from everyone, even if they needed a push!.

Invaluable advice came from Drs. Thomas Cangialosi and Sidney Horowitz.

We also want to thank all those people who made our work easier by smoothing out the road through paperwork: Barbara Stewart, Ann Emmerich, Jay Wexler, Yolanda Ruiz, Francina Wearing, Gigi Carrasquillo, Thank you Mrs. Farrington for your concern with the mailings, Mary George for your help with phone calls, and Reneé Sonnenberg for the contributions you got.

EDITORS NOTE:

This book is a work of fiction. Names, characters, places and incidents either are the product of the staff imagination or are used fictitiously, and any resemblence to actual persons, living or dead, events, exams, or locales is entirely coincidental.
